

Equix Energy Services, LLC

Pipeline & Underground Construction

Equix Energy Services is a privately held pipeline, facility, and underground electric construction firm specializing in mainline transmission and distribution pipelines, associated facilities, and underground electric systems that provide critical energy resources to the areas we live and work. We are your trusted partner for the safe, timely, and on-budget delivery of solutions.

- 1,250 team members
- 27 corporate offices in 13 states
- More than 1,200 pieces of equipment
- Quality Management Program
- Safety excellence
- Experienced workforce

Building Confidence Since 1985

Pipeline Construction

Equix Energy Services is a robust pipeline contractor averaging more than 1 million feet of gas pipeline installation per year. Our service offerings for pipeline construction include:

- Mainline pipeline construction
- Bucket-wheel and chainsaw trenching
- Steel and plastic pipeline installation
- Rock and other soil condition construction
- Gathering systems
- Midstream pipeline construction
- Laterals and looping
- Interconnects
- Pigging and cleaning
- Tap and stopple operations
- Maintenance and repair projects
- Anomaly digs and coating repairs
- Make piggable operations
- Relocations and replacements
- Class changes
- Hydrotesting
- Vacuum excavation
- Pipe stringing

Gas Distribution

Equix Energy Services averages approximately 15,000 service hook-ups every year - and that is just the start of our distribution capabilities.

- Open trench
- Joint trench
- Direction drilling
- Plowing/trenching
- Welding
- Pipe fusion
- Hot taping and stopple operations
- Re-build work main and services
- Steel and plastic capability
- Cross-bore inspection

Fabrication & Facility Construction

Equix Energy Services fabricates and constructs associated pipeline facilities and appurtenances for both greenfield and brownfield projects.

- Meter stations
- Regulation stations
- Pump stations
- Town border stations
- Bi-directional valve settings
- Launchers
- Receivers
- Site civil concrete and layout

Underground Electric

Equix Energy Services provides a vast array of services to the underground electric markets for distribution and renewable energy.

- Directional boring, trenching, and plowing
- Wind farm collection systems trenching
- Electrical conduit
- Cable pulling
- Joint trench work with natural gas lines and telecommunications
- Supply and installation of utility manholes
- Placement and setting of transformer pads
- Grounding pedestals
- Junction box replacement
- Transformers (new and upgrades)

Horizontal Directional Drilling

Equix Energy Services provides a Equix Energy Services uses drilling rigs to build pipelines, electrical systems, and telecommunications in a trenchless construction operation.

- Drills up to 5,500 feet in length
- Up to 36-inch pipe
- Rock and soil conditions
- Pullbacks up to 140,000 pounds
- Steel, HDPE, Certa-lok, Bore-Guard, PVC, continuous conduit

Trenching Services

Equix Energy supports pipeline, renewables, and electrical markets with specialty trenching services.

- Large trenchers up to 325,000 pounds 900 HP
- Additional trenchers up to 125,000 pounds 400 HP
- Single pass capability of 66 inches wide
- Single pass capability of 40' feet deep
- Pipeline trenching
- Electrical underground trenching
- Wind farm collection system trenching
